TEOLOM

• **CONCLUSIONS:** The results of this study suggest that the use of a single, standardized, and validated questionnaire is a feasible and reliable method for assessing the prevalence of S. aureus carriage in a community-based population. The prevalence of S. aureus carriage was higher in the community than in the hospital setting, and was higher in the community than in the hospital setting. The prevalence of S. aureus carriage was higher in the community than in the hospital setting, and was higher in the community than in the hospital setting.
